

Independent practitioner's assurance report

To the management of Hong Kong Internet Registration Corporation Limited ("HKIRC")

Scope

We have been engaged to perform a reasonable assurance engagement on the accompanying assertions by the management of HKIRC and Certizen Limited ("Certizen") (the "assertions"), an independent subservice organization that provides operation and maintenance services to HKIRC, that for its Certification Authority ("CA") operations at locations as enumerated in [Attachment A](#), for the period from 20 October 2025 to 25 June 2026 for its CAs as enumerated in [Attachment B](#), HKIRC with Certizen as its subservice organization has:

- disclosed its extended validation TLS ("EV TLS") certificate lifecycle management business practices in its certification practice statements as enumerated in [Attachment C](#), including its commitment to provide EV TLS certificates in conformity with the CA/Browser Forum Requirements on the HKIRC website, and provided such services in accordance with its disclosed practices,
- maintained effective controls to provide reasonable assurance that:
 - the integrity of keys and EV TLS certificates it manages is established and protected throughout their lifecycles; and
 - EV TLS subscriber information is properly authenticated (for the registration activities performed by HKIRC with Certizen as its subservice organization),

in accordance with the [WebTrust Principles and Criteria for Certification Authorities – Extended Validation TLS v2.0.1](#).

HKIRC uses Certizen (subservice organization) to provide operation and maintenance services. The controls at Certizen, are necessary, in combination with controls at HKIRC, for HKIRC to achieve the applicable WebTrust Criteria as set out in the assertions.

Certification Authority's Responsibilities

HKIRC's management is responsible for the management's assertion, including the fairness of its presentation, and the provision of its described services in accordance with the [WebTrust Principles and Criteria for Certification Authorities – Extended Validation TLS v2.0.1](#).

Subservice Organization's Responsibilities

Certizen has provided an accompanying assertion titled "Assertion of Certizen Management" (Certizen assertion) about the services provided to HKIRC. Certizen Management is responsible for its assertion and providing services in accordance with the described practices of HKIRC and designing, implementing, operating, and documenting controls designed in accordance with HKIRC's requirements, which enable HKIRC to achieve the applicable WebTrust Criteria as set out in the assertions.

Our Independence and Quality Management

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants as issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA"), which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

Our firm applies Hong Kong Standard on Quality Management 1 as issued by the HKICPA, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Practitioner's Responsibilities

It is our responsibility to express an opinion on the assertions by the management of HKIRC and Certizen based on our work performed.

We conducted our work in accordance with Hong Kong Standard on Assurance Engagements 3000 (Revised) "Assurance Engagements Other Than Audits or Reviews of Historical Financial Information" issued by the HKICPA. This standard requires that we plan and perform our work to form the opinion.

A reasonable assurance engagement involves performing procedures to obtain sufficient appropriate evidence whether the assertions are fairly stated, in all material respects, in accordance with [WebTrust](#)

[Principles and Criteria for Certification Authorities – Extended Validation TLS v2.0.1](#). The extent of procedures selected depends on the practitioner's judgment and our assessment of the engagement risk. Within the scope of our work we performed amongst others the following procedures: (1) obtaining an understanding of HKIRC's EV TLS certificate lifecycle management business practices, including its relevant controls over the issuance, renewal, and revocation of EV TLS certificates; (2) selectively testing transactions executed in accordance with disclosed EV TLS certificate lifecycle management business practices; (3) testing and evaluating the operating effectiveness of the controls; and (4) performing such other procedures as we considered necessary in the circumstances.

The relative effectiveness and significance of specific controls and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Inherent Limitation

Because of the nature and inherent limitations of controls, HKIRC and Certizen's ability to meet the aforementioned criteria may be affected. For example, controls may not prevent, or detect and correct, error, fraud, unauthorised access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection of any opinion based on our findings to future periods is subject to the risk that changes may alter the validity of such opinion.

Opinion

In our opinion, throughout the period 20 October 2025 to 25 June 2026, the assertions by the management of HKIRC and Certizen, as referred to above, are fairly stated, in all material respects, in accordance with the [WebTrust Principles and Criteria for Certification Authorities – Extended Validation TLS v2.0.1](#).

This report does not include any representation as to the quality of HKIRC and Certizen's services beyond those covered by the [WebTrust Principles and Criteria for Certification Authorities – Extended Validation TLS v2.0.1](#), nor the suitability of any of HKIRC and Certizen's services for any customer's intended purpose.

Other Matter

As indicated in the assertions by the management of HKIRC and Certizen, HKIRC with Certizen as its subservice organization began issuing subscriber certificates only after the Commissioner for Digital Policy (“CDP”) granted recognition to HKIRC as a recognized Certification Authority on 16 April 2026. No subscriber certificates were issued during the period from 20 October 2025 to 16 April 2026. Therefore, we did not perform any tests of the operating effectiveness of controls related to the WebTrust principle and criteria “The Certification Authority (“CA”) maintains effective controls to provide reasonable assurance that EV TLS subscriber information was properly collected, authenticated (for the registration activities performed by the CA, Registration Authority (“RA”) and subcontractor) and verified” and accordingly, we do not express an opinion on the operating effectiveness of controls to achieve this WebTrust principle and criteria during the period from 20 October 2025, to 16 April 2026.

Use of the WebTrust seal

HKIRC’s use of the WebTrust for Certification Authorities – Extended Validation TLS Baseline Seal constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.

Attachment C

The list of HKIRC's Certification Practice Statements in scope for the period from 20 October 2025 to 25 June 2026 is as follow:

Document Names	Version
CPS for d-Cert (Server)	OID = 1.3.6.1.4.1.64092.1.7.1 (Effective from 16 April 2026)

Hong Kong Internet Registration Corporation Limited (“HKIRC”) operates the Certification Authority (“CA”) services for its CAs as enumerated in Attachment A, and provides Extended Validation TLS (“EV TLS”) CA services.

The management of HKIRC is responsible for establishing and maintaining effective controls over its EV TLS CA operations, including its EV TLS CA business practices disclosure on its website, EV TLS key lifecycle management controls, and EV TLS certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

HKIRC uses Certizen Limited (“Certizen”) (subservice organization) to provide operation and maintenance services. The controls at Certizen, are necessary, in combination with controls at HKIRC, for HKIRC to achieve the applicable WebTrust Criteria as set out in the assertion. Certizen’s management assertion is presented following this assertion.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to HKIRC’s Certification Authority operations.

HKIRC management has assessed its disclosures of its certificate practices and controls over its EV TLS CA services. Based on that assessment, in HKIRC management’s opinion, in providing its EV TLS CA services in the Hong Kong Special Administrative Region of the People’s Republic of China (including Facility 1 and Facility 2), throughout the period 20 October 2025 to 25 June 2026, HKIRC has:

- disclosed its EV TLS certificate lifecycle management business practices in its certification practice statements as enumerated in Attachment B, including its commitment to provide EV TLS certificates in conformity with the CA/Browser Forum Guidelines on the HKIRC website, and provided such services in accordance with its

disclosed practices;

- maintained effective controls to provide reasonable assurance that:
 - the integrity of keys and EV TLS certificates it manages is established and protected throughout their lifecycles; and
 - EV TLS subscriber information is properly authenticated (for the registration activities performed by HKIRC with Certizen as its subservice organization),

in accordance with the [WebTrust Principles and Criteria for Certification Authorities – Extended Validation TLS v2.0.1.](#)

HKIRC with Certizen as its subservice organization began issuing subscriber certificates only after the Commissioner for Digital Policy (CDP) granted recognition to HKIRC as a recognized Certification Authority on 16 April 2026. As no subscriber certificates were issued during the period from October 20, 2025, to April 16, 2026, the controls related to the WebTrust principles and criteria "The Certification Authority (CA) maintains effective controls to provide reasonable assurance that EV TLS subscriber information was properly collected, authenticated (for the registration activities performed by the CA, Registration Authority (RA) and subcontractor) and verified" did not operate during the period from October 20, 2025, to April 16, 2026.

Ir Wilson Wong

Chief Executive Officer of Hong Kong Internet Registration Corporation Limited

Attachment B

The list of HKIRC's Certification Practice Statements covered in the management's assertion for the period from 20 October 2025 to 25 June 2026 is as follow:

Document Names	Version
CPS for d-Cert (Server)	OID = 1.3.6.1.4.1.64092.1.7.1 (Effective from 16 April 2026)

Certizen Limited (“Certizen”) provides operation and maintenance services for Hong Kong Internet Registration Corporation Limited (“HKIRC”), who operates the Certification Authority (“CA”) services and provides EV TLS CA services for the CAs enumerated in Attachment A.

The management of Certizen is responsible for establishing and maintaining effective controls over its operations, to support HKIRC’s EV TLS CA operations, including HKIRC’s EV TLS CA business practices disclosure on its website, EV TLS key lifecycle management controls, and EV TLS certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to supporting HKIRC’s Certification Authority operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

Certizen’s management has assessed HKIRC’s disclosure of its certificate practice and Certizen’s controls to provide operation and maintenance services for HKIRC in relation to EV TLS CA services. Based on that assessment, in Certizen management’s opinion, as HKIRC’s independent subservice organization, in providing operation and maintenance services for HKIRC in Hong Kong Special Administrative Region of the People’s Republic of China (including Facility 1 and Facility 2), throughout the period 20 October 2025 to 25 June 2026, Certizen has:

- maintained effective controls to provide reasonable assurance that:
 - the integrity of keys and EV TLS certificates it manages is established and protected throughout their lifecycles; and
 - EV TLS subscriber information is properly authenticated (for the registration activities performed by HKIRC with Certizen as its subservice organization)

in accordance with the [WebTrust Principles and Criteria for Certification Authorities – Extended Validation TLS v2.0.1.](#)

HKIRC with Certizen as its subservice organization began issuing subscriber certificates only after the Commissioner for Digital Policy (CDP) granted recognition to HKIRC as a recognized Certification Authority on 16 April 2026. As no subscriber certificates were issued during the period from October 20, 2025, to April 16, 2026, the controls related to the WebTrust principles and criteria "The Certification Authority (CA) maintains effective controls to provide reasonable assurance that EV TLS subscriber information was properly collected, authenticated (for the registration activities performed by the CA, Registration Authority (RA) and subcontractor) and verified" did not operate during the period from October 20, 2025, to April 16, 2026.
